

COR vs Peers: Feature Comparison Matrix

Why COR is the All-In-One Profitability & Operations Solution for Professional Services

The All-In-One Management Solution

COR enables professional services companies, digital agencies, consulting, and law firms to make data-driven business decisions grounded in real operational concrete metrics. Helping over **2,500 companies worldwide**, COR goes beyond generic task management by unifying project execution, team capacity planning, and real-time profitability analytics.

Unlike traditional project management tools that only track tasks and logs, COR automates time tracking, identifies rework and scope deviations, and tracks current and forecasted project profitability—allowing agency leaders to maximize billable hours and negotiate better client fees.
